energy

Invitation til
Offshore Seminar

DONG energy A/S
Achilles Danmark
ACTA A/S

Onsdag d. 28. maj 2008
Konferencecenteret Søhuset
i Hørsholm.

En spændende dag arrangeret af DMOG...

Danish Marine & Offshore Group

Foreningen retter sig mod danske virksomheder, institutioner og videnscentre indenfor offshore branchen – samarbejde søges omkring udvikling, markedsføring og afsætning. Ideen bag foreningen er at skabe et forum for strategisk samarbejde, med et klart mål for øje - vækst og eksport. Læs mere om foreningen på www.offshore-denmark.dk.

Kære deltager.

Danish Marine & Offshore Group har på sin generalforsamling 2008 besluttet at videreføre traditionen med et offshore-seminar i samarbejde med en dansk energioperatør. Vi er meget tilfredse med, at DONG Energy A/S vil fortælle om sine aktiviteter indenfor efterforskning og produktion (E&P) og blandt andet orientere os om Hejre-projekt samt vind og halm projekter. Dagen vil også bringe indlæg fra Achilles og danske samarbejdspartner og leverandører til DONG, heriblandt et DMOG medlem.

Med venlig hilsen
Danish Marine & Offshore Group

Mogens Tofte Koch

Program onsdag den 28. maj 2008

- 10.30 **Samling og formiddagskaffe**
- 11.00 **Velkomst**
*v/ Henrik Holstberg, HH-Consult A/S,
formand for Danish Marine & Offshore Group.*

Kort introduktion til indlæggene :

v/ Vice President Jesper Nørrelund

DONG Energy is an integrated energy company with leading market positions in Denmark and other key areas of Northern Europe. DONG Energy A/S is a holding company and is incorporated in Denmark. Over the past few years, DONG Energy has shifted its focus from natural gas sourcing, wholesale, exploration, and gas and oil production to becoming an integrated energy company with activities across the value chain.

Four primary business segments

We have organised reporting into four major business segments, as follows:

Exploration & Production (E&P): E&P explores for, develops, and produces natural gas and oil in the Central North Sea area (offshore Denmark and Norway), offshore mid-Norway, the Atlantic Margin (the West of Shetlands area offshore the UK and offshore the Faroe Islands) and Greenland. E&P's focus is on gas exploration and production supporting down-stream gas sales in Markets.

Generation: Generation produces power and heat primarily in Denmark but is expanding to other parts of Northern Europe.

Distribution: Distribution is responsible for distributing gas and power to Danish customers and operating one of the two natural gas storage facilities in Denmark.

Markets: Markets procures natural gas and power and sells these commodities and related products and services in Northern Europe.

v/ Klaus Kræmer, Achilles Denmark

Achilles Group works to identify, qualify, evaluate, and monitor suppliers on behalf of major organisations worldwide. We build and support buyer-supplier communities in many industry sectors, creating unique and powerful global networks. Our services for sustainable procurement help create opportunities for suppliers and reduce risk in the supply chain for buyers .

v/ Thoke Flangaard, Tekn. Dir. Acta A/S

Since 1955 ACTA have been developing and building cranes in Denmark, thus ensuring the highest quality due to the best materials, the best work force, and the ability to closely monitor the whole process from drawing the first lines, to packing the crane after an intense testing.

Today we use our knowledge and experience in co-operation with partners throughout the world in both production and after-sales service. ACTA is one of the leading engineering and production companies for cranes, deck equipment and life-saving equipment for use on large ships, offshore platforms and industrial applications.
